THE COMPANY'S MODEL 10 TABLE RADIO IS A HIGH-FIDELITY AM/FM clock radio with a state-of-the-art digital tuner and an adjustable Equalization System, which perfects the sound levels to individual preferences with controls for treble, bass, loudness and balance. All of its functions are accessed by a single top-mounted remote control or with a full-function remote control. The Model 10 comes in a palette of furniture-grade woods and high-gloss finishes featuring walnut, cherry, ocean blue, midnight blue and carmine red (pictured). INNOVATIVE TECHNOLOGY'S IPHONE/IPOD BOOM BOX takes you back in time to the 1980s. The new product has the look of a classic oversized boom box from three decades ago, with the latest technology from 2010. It charges the user's iPhone or iPod while playing music and includes an AM/FM radio and a digital clock. Just as 1980s boom boxes recorded music on cassette tapes, the iPhone/iPod Boom Box records directly on to its USB or SD card reader in an MP3 format. [ithomeproducts.com](http://ithomeproducts.com)
